

Predicting the future: Device as a Service Analytics

With so many devices running across your business, IT is facing a logistical nightmare that could expose your organisation to security threats. You need clear visibility of your device landscape to minimise both risks and costs.

64%

of companies experienced a significant breach via an endpoint in the last year alone.¹

40%

of reported security breaches are caused by employee negligence.²

72%

of ANZ workers say outdated technology is harming their productivity.³

The Benefits of DaaS

Lexel's Device as a Service (DaaS) solution offers real-time analytics to help you stay on top of your device management processes. Leveraging HP TechPulse asset management software, Lexel delivers the peace of mind you need.

Device Agnostic

Multi-vendor and multi-OS analytics provide insights from any device including Windows, Android, Mac, and iOS.

Performance Analytics

CPU and memory utilisation graphs identify which devices are being over or underutilised.

Proactive Security

Receive real-time alerts for devices and users that are non-compliant with encryption, firewall, and antivirus policies.

Predictive Maintenance

Reduce business interruptions by pre-empting if a particular device is nearing capacity, isn't patched, or is running out of date apps and OS.

Health Monitoring

Find out if devices and hardware are nearing the end of their useful life or require repairs through battery, disk and system monitoring.

Control Compliance

Set rules to ensure your devices and users remain compliant with your legal, ethical, and safety obligations, as well as enforcing house policies.

Intuitive dashboards

A seamless user-experience that delivers comprehensive insights on inventory, incidents, and system health.

Lexel's DaaS offering combines hardware, device analytics, and proactive management services for every stage of the device lifecycle - so you can focus on empowering users to move your business forward.

Contact Lexel today to discuss our simple, flexible DaaS plans that can be tailored to your unique business needs.
